

Pronounce this Version 2.0

Dependencies

There is only one required dependency `curl`, however the rest require some configuration before you can replace them.

Optional dependencies

- `dmenu`
- `fzf`
- `parallel`
- `mpv`
 - If you wish to use another media player, make sure you change the `PLAYER="YouMediaPlayer"` variable !

Install

```
git clone https://github.com/AnasBoubechra/Pronounce_this.git
cd Pronounce_this && chmod +x pt
# Make sure you put the script in your $PATH
./pt # Or 'pt' if the script is in path
```

To put the script in your path

```
PATH="$HOME/.local/share/bin/" # Or '/usr/bin'
```

Usage

- Simple query based search `pt -q <string>`
- Generic pronunciation `pt -p "Hello world"`
- To list the audio files using `dmenu` `pt -mq <string>` Or `pt -m -q <string>`
- To list the audio files using `fzf` `pt -fq <string>` Or `pt -f -q <string>`
- Use a specific language code (en,de,fr...) `pt -q <string> -l de`
- German grammar pronunciation `pt -c 'verb indikativ praesens'`
 - For more options see `pt -c -h`

Enhancements

- `Fzf` support
- `Dmenu` support
- Offline audio downloads
- generic Pronunciation of any language
- POSIX-compliant
- parallel downloads • .RS 3

Efficient memory usage

Support
